

regibox®

registered e-box
brought to you by Satswana

Secure, efficient and verifiable team work with regibox.

Making documents available to a group of users with all revisions of these documents, is a key task of projects and business processes of any kind. If this task must be performed in an auditable manner and the documents must be protected against access from third parties, then regibox is the right choice. Every regibox will be automatically registered with a trusted, independent third party in a verifiable manner as is required for business purposes.

Highest levels of data security and data protection

- User-friendly administration with minimal efforts
- Data protection on all levels with end-to-end encryption
- Anonymised key management via a trusted, independent third party
- The service provider/hoster of a regibox (regify provider) has no access to data

Verifiability (REGister & CertIFY)

- Automatic registration of a regibox and its members
- Registration information deposited with a trusted, independent third party
- Verification of registration data on demand at any time

Flexible Usage Options

- One regibox for an organisation or one per group or task
- Operational flexibility with options for public and private cloud
- **Public Cloud:** regify services offered by more than 25 regify providers
- **Private Cloud:** service operated by your organisation (corporate provider status)
- Available for all major software platforms

Barrier free entry

- Mobile (Android, iOS) and desktop
- Multiple authentication options
