

# regichat®

registered electronic chat  
brought to you by Satswana

## Concluding business agreements online with regichat.

With regichat, regify offers a powerful and innovative form of chat that is not only secure but also trusted and binding. regichat provides auditable recording of the chat session. When a regichat session ends, this recording is sent digitally to the participants and only they can access it. Moreover, meta data of the chat is registered with a trusted, independent third party. In consequence, participants of a regichat receive non-repudiable documentation for their business transactions which is legally reliable. For Financial Services organizations, regichat will ensure you can stay compliant, competitive, and at the same time will lower your regulatory risk and chance of reputational damage.

### Verifiability (REGister & certIFY)

- Chat transcript sent to participants in encrypted format (regimail)
- Chat meta data recorded by Trusted independent third party (TITP)
- Chat transcript digital fingerprint is registered with TITP
- Chat transcript integrity certified by TITP on demand at any time

### Usage possibility

- Operational flexibility with options for public and private cloud
- **Public Cloud:** regify services offered by more than 20 regify providers
- **Private Cloud:** service operated by your organisation (corporate provider status)
- Integration into business applications via Application Programming Interface (API)
- Available for all major software platforms including mobile ones (Android, iOS)

### Barrier free entry

- Browser-based without additional software
- SMS invitation, e-mail invitation and password-protected entry into the chat
- Multiple authentication options, selection by the chat initiator
- Participants' status and presence are shown during chat
- File transfer (e.g. upload of documents such as Terms & Conditions)
